TOWN OF
VICTORIA PARK

- Common name:** Peppermint
Botanical name: *Agonis flexuosa*
Height: 8.2m
Width: 9.4m
Origin: WA
Fauna attracting: Yes

Graceful weeping tree with green foliage and fibrous bark. Small white perfumed flowers cluster along the branches between the leaves.

- Common name:** Smooth barked apple
Botanical name: *Angophora costata*
Height: 15.7m
Width: 9.5m
Origin: Australia
Fauna attracting: Yes

Smooth salmon-pink to pale grey bark, with clusters of white flowers during summer. New foliage growth is red, turning green with age.

- Common name:** Yellow blood wood
Botanical name: *Corymbia eximia*
Height: 12.2m
Width: 10.8m
Origin: Australia
Fauna attracting: Yes

Emerald green foliated tree with large clusters of creamy white flowers at the ends of the branches in spring. Bark is tessellated and tan to light brown in colour.

Common name: Red flowering gum

Botanical name: *Corymbia ficifolia*

Height: 8.1m

Width: 8.1m

Origin: WA

Fauna attracting: Yes

A medium sized tree with clusters of red flowers at the ends of the branches in summer, forming gum-nuts which are enjoyed by local birds. Dark glossy green leaves with dark brown, rough textured bark.

Common name: Spotted gum

Botanical name: *Corymbia maculata*

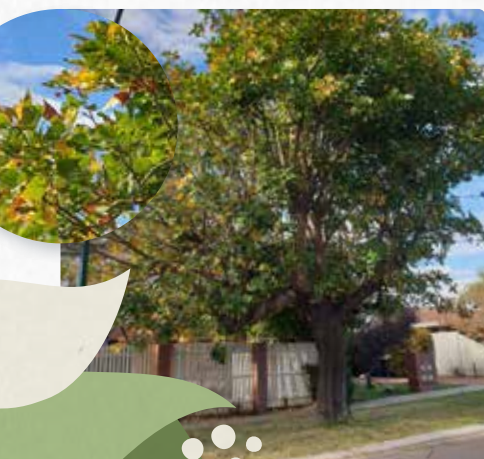

Height: 17.6m

Width: 9.7m

Origin: Australia

Fauna attracting: Yes

Tall slender tree with smooth cream mottled bark. Leaves are long and narrow in shape. White flowers bloom from winter to spring, attracting honey eating birds.

Common name: Common coral tree

Botanical name: *Erythrina sykesii*

Height: 9.8m

Width: 8.8m

Origin: Exotic

Fauna attracting: No

Large leaves group in threes. Clusters of trumpet-like flowers bloom in winter and early spring.

- Common name:** Tuart
Botanical name: *Eucalyptus gomphocephala*
Height: 16.5m
Width: 9.6m
Origin: Local native
Fauna attracting: Yes

Tall upright tree with rough grey-brown bark and glossy light green to green foliage. White flowers bloom from January to April.

- Common name:** Yellow gum
Botanical name: *Eucalyptus leucoxydon*
Height: 8.3m
Width: 8.3m
Origin: Australia
Fauna attracting: Yes

Upper branches have smooth bark with long slender grey-green foliage. Flowers are crimson and are clustered between the leaves.

- Common name:** Salmon white gum
Botanical name: *Eucalyptus lane-poolei*
Height: 8m
Width: 5m
Origin: WA
Fauna attracting: Yes

Smooth bark with cream-white flowers from January to April. Medium green foliage. Attracts bees and birds.

- Common name:** Jarrah
Botanical name: *Eucalyptus marginata*
Height: 11.8m
Width: 8.9m
Origin: Local native
Fauna attracting: Yes

Rough brown linear bark with slender green leaves. Clusters of white, nectar-filled flowers during spring and summer attract bees and birds.

- Common name:** Coolibah
Botanical name: *Eucalyptus microtheca*
Height: 17.5m
Width: 7m
Origin: WA
Fauna attracting: Yes

Tall slender tree with a weeping form. Long narrow leaves are light grey-green in colour. Clusters of small white flowers form along branches of new growth.

- Common name:** Narrow leaved black peppermint
Botanical name: *Eucalyptus nicholii*
Height: 12m
Width: 7.7m
Origin: Australia
Fauna attracting: Yes

Grey to grey-brown bark which sheds in short ribbons. Narrow lanceolate leaves are soft grey-green in colour.

- Common name:** Iron bark
Botanical name: *Eucalyptus sideroxylon*
Height: 11.2m
Width: 8.2m
Origin: Australia
Fauna attracting: Yes

Very dark brown to black bark. The dramatic bark colour forms a great backdrop to the lanceolate grey-green foliage. Flowers are produced from winter to early spring and can vary from creamy white to pink and red in colour.

- Common name:** Pricklybark
Botanical name: *Eucalyptus todtiana*
Height: 6.7m
Width: 6.8m
Origin: Local native
Fauna attracting: Yes

A beautifully shaped shade tree with fibrous rough bark. Clusters of white-cream flowers bloom from January to April.

- Common name:** Coral gum
Botanical name: *Eucalyptus torquata*
Height: 5m
Width: 5.4m
Origin: WA
Fauna attracting: Yes

A medium to small tree flowering between Aug-Dec with clusters of pink-red blooms. A species from the Eastern Goldfields is a hardy species for Perth.

- Common name:** Wandoo
Botanical name: Eucalyptus wandoo
Height: 6.7m
Width: 6.2m
Origin: WA
Fauna attracting: Yes

The trunk of the tree is usually straight with smooth bark. Clusters of flower buds bloom through the months of Dec–May.

- Common name:** Jacaranda
Botanical name: Jacaranda mimosifolia
Height: 9.8m
Width: 8.9m
Origin: Exotic
Fauna attracting: Yes

A deciduous tree with soft fine green foliage turning yellow before shedding. Large clusters of purple bell-shaped flowers form in summer, followed by curved green seed pods.

- Common name:** Liquidambar
Botanical name: Liquidambar styraciflua
Height: 11.8m
Width: 9.2m
Origin: Exotic
Fauna attracting: No

White flaky paper-like bark. Leathery textured green grey leaves forming a dense canopy. Creamy white bottle brush-like flowers appear in autumn.

- Common name:** Broad leaved paperbark
Botanical name: *Melaleuca quinquenervia*
Height: 9.7m
Width: 7.9m
Origin: Australia
Fauna attracting: Yes

White flaky paper-like bark. Leathery textured green grey leaves forming a dense canopy. Creamy white bottle brush-like flowers appear in autumn.

- Common name:** London plane tree
Botanical name: *Platanus acerifolia*
Height: 14.2m
Width: 11.3m
Origin: Exotic
Fauna attracting: No

Deciduous tree with large 5-lobed leaves turning burnt orange and yellow in autumn before falling. Bark is smooth cream in colour with a camouflage-like mottled texture. Small round seed balls form and hang through the winter.

- Common name:** Bradford Pear
Botanical name: *Pyrus calleryana* 'Bradford'
Height: 6.1m
Width: 5.8m
Origin: Exotic
Fauna attracting: No

A medium sized deciduous tree with a dense form and foliage. Leaves turn red-orange in autumn with clusters of small white flowers blooming in spring.

- Common name:** English Oak
Botanical name: *Quercus robur*
Height: 5.2m
Width: 6m
Origin: Exotic
Fauna attracting: No

Deciduous tree with rough, dark brown to grey bark. Leaves are broad and oblong, densely arranged on the branches. Clusters of small acorns form from summer to autumn.

- Common name:** Chinese elm
Botanical name: *Ulmus parvifolia*
Height: 8m
Width: 7.7m
Origin: Exotic
Fauna attracting: No

Small dark green oval-shaped foliage with serrated edges. Deciduous, with mottled flaky bark varying in colour between brown, reddish brown, dark grey and cream.

- Common name:** Zelkova Serrata 'Green Vase'
Botanical name: Japanese zelkova
Height: 12m
Width: 8.3m
Origin: Exotic
Fauna attracting: No

A graceful, uniformly branching deciduous tree. Smallish bright green leaves are pointed with serrated edges. Bark is smooth, dark brown-grey in colour.
