

# Macmillan Precinct Masterplan

## Where to next?

The project lifecycle enters detailed planning and approval stage

**We present to Council:**

Nov: we present our concept report, with next steps for masterplan development, for Council approval.

**Your feedback guides our next steps:**

We redefined your feedback into a concept report for Council to approve.

**2020 onwards**

**We'll continue to engage with you:**

We will invite community members and key stakeholders to let us know your thoughts on the masterplan throughout the process.

**Then we develop the masterplan:**

We're heads down on masterplan development. Like all development plans, it takes time!

**We're also working on inputs into the masterplan:**

Detailed planning for Leisurelife and library and other community services on site, landscaping, traffic and parking, built form principles, scenarios for Town's administration and civic functions.

**2021**

**2020-2021**

**Your feedback helps us achieve together:**

Following public comment, we analyse feedback and provide a report back to Council for approval to proceed to the next stage.

**2021**

**We come up with a Business Delivery Case:**

At the end of the masterplan we will begin the preparation of business options on how we could facilitate the delivery of the Macmillan Precinct Masterplan.

**We progress through a planning development lifecycle:**

Following the masterplan approval, we'll navigate the planning process required to undertake development.

**2021**
