

Policy number	Policy 254		
Policy title	Remnant native vegetation		
Strategic	EN6 – Appropriate, inviting and sustainable green spaces for everyone that are well		
outcomes	maintained and managed.		
supported	EN7 – Increased vegetation and tree canopy.		

POLICY OBJECTIVE:

To provide for the management of remnant native vegetation on land under the control or management of the Town.

POLICY SCOPE:

This policy applies in relation to land under the control or management of the Town.

DEFINITIONS:

Remnant native vegetation means those patches of native trees, shrubs and grasses still left. Remnant vegetation:

- can be any shape or size.
- can include all types of native vegetation communities

POLICY STATEMENT:

- 1. The management of remnant native vegetation on any land owned by, vested in, or managed by the Town shall be in accordance with the following policy.
- 2. Only plant species indigenous to the particular area are to be maintained or re-established within naturally vegetated areas. All new plantings or sowing by seed shall be at the commencement of autumn rains whenever possible. Plants shall be tube stock or stock of a similar size.
- 3. Areas of native vegetation that are eroded or have no vegetative cover and that require stabilisation shall be re-vegetated using rehabilitation methods or practices appropriate to the particular situation.
- 4. Weeds such as veldt grass and broad leaf species are to be removed by hand, spot sprayed, and/or treated with selective herbicide application. Weed spraying is to be carried as required, during appropriate climatic conditions and the weed life cycle.
- 5. All established trees in areas designated for public access are to be inspected every 2 years and maintained to ensure they are not a safety hazard. Retention of the fauna habitat shall, wherever possible, be facilitated when remedial work is undertaken.
- 6. Areas shall be inspected regularly for rubbish accumulation, firebreak and fence repairs and corrective maintenance shall be undertaken promptly.

- Access to remnant vegetation areas shall be controlled as per the *Local Government Property Local Law* 2000. Vehicles, other than service vehicles, are prohibited. Pedestrian traffic is to be confined to designated paths except where prior permission to access an area has been granted.
- 8. As a rule it is desirable that remnant vegetation areas be fenced to control access. The fencing shall be of a type that is appropriate to the particular site and suitable for fire management purposes.
