Volleyball (Option 2)	Whilst the proposal by Volleyball WA to utilise Koolbardi Park as a potential introduction to the sport is worthy of consideration, there are too many unknowns at this stage to determine if the sport will be successful. Will the schools want to participate? How will they get the students to the park? Who will supply the equipment long term and where will it be stored?	Long-term, will require the purchase of nets, balls, whistles, storage shed and line marking. Costs unknown at this time.	Temporary nets and cones when in use. Existing courts surface is not ideal for this sport, would only accommodate training purposes. Change in line marking will be required. Requirement for nets and posts which would need to be stored in a locked facility on site, The supply of poles and nets will be necessary. The courts will also need to be re-lined to (1) remove the basketball markings and (2) add in volleyball markings.	5-12 years	Volleyball WA will need the Town's assistance to encourage schools/kids living in the area to participate in the come and try day. May require a booking system in place to reduce conflict with tennis players.	May be an issue with use of whistles and balls bouncing with some community members already expressing their concerns following the December 2022 report. No noise testing has been done on volleyball sports in WA.	Not recommended
Pickleball (Option 3)	Since investigations into Pickleball commenced, the sport has been launched at Leisure Life. Based on this information it seems that introduction at the park may negatively impact on the organised opportunity at Leisure Life.	n/a	n/a	n/a	Will negatively impact the organised sport at Leisure Life.	As this is a relatively new sport there is no noise testing data available.	Not recommended
Recreation use (Option 5)	This option is compatible with the infrastructure already in place in the park for children aged 4 to 12 years old. Designs to be painted on one court only, with tennis lines still in place on both courts.	An indicative cost for the recreational space is \$25,000.	Whole court surface will need to be repainted, coloured and line marked.	4-12 years	No impact	The implementation of this recreational use space is not expected to cause any disturbance to members of the community in terms of noise levels.	Preferred option as it combines in well with remainder of park facilities.
Tennis Only (Option 7)	The two tennis courts are used well by members of the community, especially being a facility offered at no charge.	All infrastructure is already in place. Minimal costs required to re-paint and re-line to remove basketball lines.	Already in place	All ages	No impact unless a booking system is implemented to control usage if issues arise	The continued playing of tennis is not expected to cause any disturbance to members of the community in terms of noise levels.	Recommended, only if Council wish to remove multi-use.
