

Policy number	Policy 205
Policy title	Vehicle crossovers
Strategic outcomes supported	EN2 – A safe, interconnected and well-maintained transport network that makes it easy for everyone to get around. EN5 – Appropriate and sustainable facilities for everyone that are well built, well maintained and well managed.

POLICY OBJECTIVE:

To provide guidance for the construction of vehicle crossovers in the Town

POLICY SCOPE:

This policy applies to the construction and maintenance of vehicle crossovers.

DEFINITIONS:

Nil.

POLICY STATEMENT:

1. A vehicle crossover may be constructed either:
 - a. by the Town – by means of an approved contractor - upon application by the property owner, or
 - b. by the property owner.
2. All crossovers shall be constructed in accordance with the Town’s crossover specifications in either insitu concrete; insitu limecrete; insitu exposed aggregate or approved brick/block paving.
3. The Town will contribute towards the cost of the crossover in accordance with the amount shown in the Schedule of Fees and Charges contained within the Annual Budget. This amount will subsidise the cost of one, and the first new crossover to each individually titled lot or strata development.
4. The Town will also contribute towards the cost of replacing an existing bituminous crossover in insitu concrete, insitu limecrete, insitu exposed aggregate or approved brick/block paving in accordance with the amount shown in the Schedule of Fees and Charges contained within the Annual Budget.
5. The Town will not repair nor contribute to the cost of repairing or resurfacing a bituminous crossover.
6. The maximum width of any crossover and/or adjoining crossover shall be 6 metres or to a maximum of 40% of the property frontage, except for commercial/industrial premises.
7. In cases of financial hardship or where the property owner is an aged or invalid pensioner, the Town may agree to construct a crossover and have the owner’s share of the costs paid by instalments or have it remain a charge against the property.

Construction by owner (or owner's agent/contractor)

8. Owners who elect to undertake the construction or modification of a crossover themselves, or by a contractor of their choice, must first obtain the Town's approval. There are restrictions on the location and size of crossovers and the construction must be to Town specifications. Owners may make application for a contribution from the Town for the first new crossover they have constructed or bituminous crossover they have reconstructed. The contribution will only be made if prior approval to construct the crossover was given by the Town and all conditions associated with the approval, including compliance with the specifications, have been met.
9. The contribution by the Town is to be determined annually by the Chief Executive Officer.
