

13.1.2 – Amendment (Signs on Thoroughfares) Local Law 2020

No.	Submission received	Officer's response	Amended – Y/N
1	I support. The proposed wording is clear and reasonable. It reaches a simple balance of protecting the interests of persons using a thoroughfare, and a business's right to advertise and direct customers.	Noted.	N
2	I do not wish to state a position for or against I seem unable to find the actual wording of the proposed amendment, but would like to offer my perspective which is that A-frame signs and other advertising material such as corflute "socks" for bollards clog the footpath and cause a great deal of visual pollution. As a society we are subjected to a barrage of advertising day in and day out, and I support any move to reduce this. On a more practical note, the A-frames in particular cause footpath traffic blockages and are a trip hazard. I say this as a fully able-bodied person - I would hate to be trying to navigate the footpaths with limited vision or mobility aids! The A frames detract from the ambience of al fresco areas and I think they should be disallowed across the entire town.]	Noted	N
